# Wildlife Walk

Students will use their observation skills to identify signs of wildlife.

 Wildlife Walk Checklist, Nature Journal, binoculars, camera, ID guide, printable track sheet (all optional)

 Grades: all  Variable  Activity sheet included

## Introduction

One of nature's services we can all tap into is "education and inspiration". We can wonder, and be amazed by the biodiversity that is all around us. However, wildlife do not always cooperate by standing out in the open for us to enjoy. This means we need to use our observation skills to look extra closely at our surroundings. Ready to do some wildlife detective work? Let's go!

## Activity

1. Head out to your backyard or further afar with your family on a wildlife walk.

- Slow down, look closely.
- Get down on all fours and see what you notice that you might have missed from standing height.
- Look up! See what might be happening on and in the trees you see on your Wildlife walk.

2. While you are out on your wildlife walk consider the following questions:

- **Who:** Who left this track? Or scat?
- **What:** What was the animal doing?

- **When:** When was it here?
- **Where:** Where was it going? Where did it come from?
- **Why:** Why was it here?
- **How:** How would it feel to be this animal, to see through its eyes?

## Additional Resources

To help you identify what wildlife have been around use this animal **track identification sheet**.

See page two for a handy checklist that includes things you may see and will help you track your discoveries.

Share photos of you and some of the cool wildlife signs you find on our **Facebook page**.

# Wildlife Walk Scavenger Hunt

Wildlife Sign	✓	What animal do you think made this?
Hole in a tree		
Tunnel in the earth		
Hoof print		
Paw print		
Patterns on a tree trunk		
Nest in a tree		
Bark rubbed off a tree
