

# BEYOND RECYCLING

Name: \_\_\_\_\_

# ***COMMUNITY OF THE FUTURE***

# ***DESIGN & RECORD YOUR IDEAS HERE***

In this project you get to use your imagination to develop a community of the future

People in my group are: \_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

My group needs to plan & design to include the following areas in our community of the future:

- waste & resources
- energy
- water
- transportation
- food

**Now YOU get to decide what the future will look like**

Sustainability means that you will consider the well being of every living thing for many years to come, in the choices you make today

**What if you were invited to attend a super important student planning meeting?**

What if this meeting brought together students from all around the world to help decide what communities in the future will be like?

What do you imagine your Community of the Future will look like?

Draw or record your ideas below

# WASTE & RESOURCES

To create a sustainable community of the future you will need to:

- create zero waste
- use resources responsibly

---

---

---

---

Draw or record your ideas below

# FINAL CHECKLIST

Does your Community of the Future:

- create zero waste
- use resources responsibly
- use renewable energy
- conserve energy
- access & use freshwater
- conserve & protect water
- create no pollution
- have efficient transportation systems
- grow the food your community eats
- make no food waste

Does your project also:

- have community agreements or bylaws
- connection between areas
- include creative solutions

# ***FOOD***

To create a sustainable community of the future you will need to:

- grow the food your community eats
- make no food waste
