

FutureMakers

Name: _____

FUTUREMAKERS

Imagine you were invited to attend an important planning meeting that gathers youth from around the world to help decide what the future will be like.

Your FutureMakers planning booklet will help you dream, design and build your community of the future.

There are 7 videos to help you learn, prepare, plan & design your community:

- 1. Invitation
- 2. Food
- 3. Waste & Resources
- 4. Water
- 5. Energy
- 6. Transportation
- 7. Design & Build

Now YOU get to decide what the future will look like!

SUSTAINABILITY

Sustainability means that you consider the well-being of every living thing, for many years to come, in the choices you make today.

#1. INVITATION

How will your sustainable community of the future be beautiful, fun and include everyone?

Draw or describe 4 ideas you would like to include in your community:

Four large, overlapping thought bubble shapes are provided for drawing or describing ideas. Each bubble is a simple outline with a drop shadow effect, designed to be filled with a drawing or text.

#2. FOOD

To create a sustainable community of the future you will need to:

Grow the food your community eats

Make no food waste

How will your community grow, harvest, share, and store food?

Draw or record your food ideas below:

#3. WASTE & RESOURCES

To create a sustainable community of the future you will need to:

- Create zero waste
- Use resources responsibly

How will your community of the future cycle waste and use resources responsibly?

Draw or record your waste & resource ideas below:

#4. WATER

To create a sustainable community of the future you will need to:

- Use water wisely
- Protect water

How will your community protect water for humans, nature and future generations?

Draw or record your water ideas below:

#5. ENERGY

To create a sustainable community of the future you will need to:

- Use renewable energy
- Conserve energy

How will your community buildings conserve energy?

Draw or record your energy ideas below:

#6. TRANSPORTATION

To create a sustainable community of the future you will need to:

- Create no pollution
- Have efficient transportation systems

How will your transportation system be efficient and easy to use?

Draw or record your transportation ideas below:

#7. DESIGN & BUILD

What is something you love about your community of the future?

Why is your community a place you want to live?

Which areas in your community are linked?

food waste water energy transportation

How are these areas linked?

DRAW - WRITE - PLAN - DREAM
